

distorted current

distorted reference

- Legend for the tangent condition plots:
- $n=0$, no reconnection (dashed blue line with circles)
 - $n=0$, edge flip (solid blue line with circles)
 - $n=2$, no reconnection (dashed green line with circles)
 - $n=2$, edge flip (solid green line with circles)
 - $n=5$, no reconnection (dashed red line with circles)
 - $n=5$, edge flip (solid red line with circles)
 - $n=10$, no reconnection (dashed purple line with circles)
 - $n=10$, edge flip (solid purple line with circles)
